DETAILED ACTION

Specification

1. The disclosure is objected to because "and" (page 11, line 11) should be --an--.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 81-84, 88-91, and 95-110 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-13, 16, 27, 31, and 42-45 of U.S. Patent No. 6,254,928. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one having ordinary skill in the art at the time the invention was made to use at least one precursor as a liquid. Also, the claims in the instant application appear to broaden the invention

by eliminating certain limitations recited in the Patent. However, to remove some of the method limitations would have been obvious to one having ordinary skill in the art as long as usable particles may still be formed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

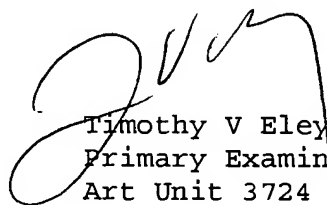

- The cited prior art discloses methods of forming particles.
